

# Google Calendar

## Plugin

The **plugin** substitutes in a article the string {googlecalendar} by the Google Calendar include code.

## Module

This **module** places on a module position the Google Calendar defined by the Google Include Code

## The Google Include Code

How to obtain this code is described in [support.google.com/calendar](https://support.google.com/calendar). Follows the link Sharing and invitations – Sharing and embedding – Embed on your website. The **Google Embeddable Calendar** Helper of Google controls all the properties of the include agenda like size, who may see the calendar, color ...."
